EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jerome Glasser on December 8, 2010.

The application has been amended as follows:

Claims 60-65 have been canceled.

Claims 51, 55 and 56 have been amended according to the following final form:

Claim 51 (amended) A device capable of holding a plurality of items for display, comprising:

- a front substantially planar member having a front exterior surface and a back interior surface made of plastic;

- a back substantially planar member having a front interior surface and a back exterior surface made of plastic;

- integrally molded into at least one of the substantially planar members, there being at least two substantially straight, smooth and linear, raised, co-planar ribs having a predetermined thickness and lying at 90-degree right angles in perpendicular relation to each other, thereby forming a cross-shaped configuration having a central hub and extending radially outward therefrom;

- means for joining said front and back substantially planar members using sonic welding, whereby said substantially straight and smooth, linear, raised, co-planar ribs are located between said front and back substantially planar members, thereby defining multiple spatial cavities suitable for the introduction thereinto of at least one display item; and

- means for the exertion of an interiorly directed pressure between said front and back substantially planar members is provided by a gradient surface having the exterior edge of at least one of the substantially planar members forming the lower edge of the gradient surface,

Art Unit: 3677

wherein said gradient surface is positioned to form part of the interior of said defined spatial cavity.

Claim 55 (amended) A device capable of holding a plurality of items for display, comprising:

- a front substantially planar member having a front exterior surface and a back interior surface made of translucent plastic;

- a back substantially planar member having a front interior surface and a back exterior surface made of plastic;

- on a surface of at least one planar member, there being at least two substantially straight, smooth and linear, raised, co-planar ribs having a predetermined thickness and lying at 90-degree right angles in perpendicular relation to each other, thereby forming a cross-shaped configuration having a central hub and extending radially outward therefrom, wherein said central hub has a hole;

- means for joining said front and back substantially planar members wherein said substantially straight and smooth, linear, raised, co-planar ribs are located there-between, thereby defining multiple spatial cavities suitable for the introduction therein of at least one display item, and so that an interiorly directed pressure between said front and back substantially planar members is exerted on said at least one display item therein; and

- said exterior surface of said back substantially planar member having a magnet element.

Claim 56 (amended) The device capable of holding a plurality of items for display according to claim 50, wherein:

- the front substantially planar member is made of plastic;

- the back substantially planar member is made of plastic;

- said substantially straight, smooth and linear, raised co-planar ribs are separate, from said front and back substantially planar members;

- said means for joining said front and back substantially planar members is sonic welding;

- said central hub has a hole;

Art Unit: 3677

said front and back substantially planar members is an at least partial texturing of the plastic surface on at least one of said substantially planar members, wherein said partially textured surface is positioned to form part of the interior of said defined spatial cavity.

Election/Restrictions

Claims 50, 51, 55 and 56 are allowable. The restriction requirement between the Species indicated and as set forth in the Office action mailed on 05/05/2009, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 56, directed to a non-elected Species is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 60-65, directed to non-elected species have remained withdrawn from consideration because they do not require all the limitations of an allowable claim. Subsequently, claims 60-65 have been canceled herein as authorized by applicant.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The indication of allowability to claims 51 and 55 were communicated in the prior Office action mailed on 04/21/2010, where Applicant has rewritten claims 51 and 55 in independent form. In view of the amendment to claim 50, claim 50 is allowed since the prior art of record fails to anticipate or render obvious the presently claimed device capable of holding a plurality of items for display, when viewed as a whole, requiring the structural combination, or claimed combination of

Art Unit: 3677

elements defining the invention(s), requiring wherein the front and back substantially planar members; integrally molded into at least one of the substantially planar members, there being at least two substantially straight, smooth and linear, raised, co-planar ribs having a predetermined thickness and lying at 90-degree right angles in perpendicular relation to each other forming a cross-shaped configuration having a central hub and extending radially outward therefrom; means for joining the front and back substantially planar members, the ribs being located between the front and back substantially planar members defining multiple spatial cavities suitable for the introduction therein of at least one display item; and means for the exertion of an interiorly directed pressure between the front and back substantially planar members is provided by a gradient surface having the exterior edge of at least one of the substantially planar members forming the lower edge of the gradient surface, wherein the gradient surface is positioned to form part of the interior of the defined spatial cavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Sandy whose telephone number is 571-272-7073. The examiner can normally be reached on M-F (7:30-4:00).
